Enthusiast

Faisalabad, Punjab, Pakistan

Summary

CS student with hands-on experience building web and AI-driven applications. I've developed a plant health detection app (Python, Streamlit) and a full-stack e-commerce platform (PHP, MySQL), among 4 projects on my GitHub. Certified in Google AI Fundamentals, Microsoft 365 Copilot, and AI Fluency, with a growing focus on applying AI tools to solve real-world problems. Strong problem-solver with logical thinking and clear technical writing skills, always looking to turn ideas into working software. I also volunteer at medical camps with the Alkhidmat Foundation and previously volunteered with the Eliya Care Foundation. Outside of tech, I love traveling and exploring new cafes and food spots.

Education

The University of Faisalabad

Bachelor of Science, Computer Science · (September 2023 - June 2027)
